## Executive Summary

Frontend Developer skilled in building responsive web interfaces using React.js, JavaScript, Tailwind CSS, and Framer Motion. Started by creating multiple practice projects to strengthen core skills, followed by a frontend internship at TechHorizon, where I developed the complete UI of the company's official website. Currently focused on improving development workflows, communication, and collaboration while seeking opportunities to contribute and grow as a frontend developer.

## Core Competencies and Skills

**Frontend Development** | React.js | JavaScript (ES6+) | HTML5 & CSS3 | Bootstrap & Tailwind CSS | Responsive UI/UX Design | State Management (React Hooks & Context API)  
**Backend & Database** | Firebase (Authentication, Firestore, Realtime Database) | API Integration (REST APIs, OpenWeatherMap API)  
**Development Tools & Version Control** | Git & GitHub | Debugging & Performance Optimization | Code Versioning & Deployment

## Education

- Diploma in Software Engineering (ACCP Prime 2.0) – Aptech Pakistan (2024 - Present)
- React with Firebase Bootcamp – CodeGirls by ConsulNet Corporation (Dec 2024 - Mar 2025)
- Intermediate in Pre-Engineering – Govt. Degree College for Women Nazimabad (2022 - 2024)
- Matriculation in Science – New Day Secondary School (2019 - 2021)

## Professional Experience

### 1) Frontend Developer Intern at TechHorizon – (Apr 2025 - Jun 2025)

Completed a frontend internship where I independently developed two major React.js projects. First, I built the complete frontend of the company's official website, including pages like Home, About, and Services using React.js, Tailwind CSS, and Framer Motion. Second, I created a solo laptop e-commerce platform with a customer interface, admin dashboard, and responsive design. These projects helped me strengthen my component-based development, UI structuring, and frontend workflow in a professional setting.

### 2) LinkedIn Outreach Intern at Trendtial – (May 2025 - Present)

Started as a LinkedIn Outreach Intern and later continued voluntarily in a support role. Contributed to growing the company's professional network by crafting and sending targeted connection messages, engaging through comments, and supporting LinkedIn branding efforts. This role helped me strengthen my communication, digital engagement, and remote collaboration skills.

### 3) Teaching Experience – (Sept 2023 - Jan 2024)

Taught ECD kids and students in grades 9–12 at a tuition center for 3 months. Designed and implemented lesson plans, focusing on core subjects and adapting to each student's learning style. This experience helped me strengthen my communication, presentation, and problem-solving skills while effectively teaching a diverse age group.

## Frontend Projects

### 1) LapShop (Laptop E-Commerce)

- Building a responsive and user-friendly laptop shopping site using React.js, Tailwind CSS, and Framer Motion, with a focus on clean UI and smooth user experience.
- Developed key sections like product listings, category cards, and detail pages; currently extending features based on new project requirements.
- GitHub: [Repo Link](#) | Live Demo: [Lapshop](#)

## 2) TechHorizon (Official Website of Software Company)

- Handled the entire frontend development of the company's official website independently, using React.js, Tailwind CSS and Framer Motion.
- Designed to showcase company services, team, and information with a clean layout and engaging user interface.
- GitHub: [Repo Link](#) | Live Demo: [TechHorizon](#)

## 3) Freshbaked (Bakery Business Portfolio)

- Developed a fully responsive and dynamic bakery website using React.js and Tailwind CSS.
- Implemented reusable components, dynamic product listings, interactive animations (AOS), smooth navigation, error handling(404 page), and authentication & CMS integration in collaboration with a team.
- GitHub: [Repo Link](#) | Live Demo: [Freshbaked](#)

## 4) Dynamic Management (Restaurant CMS)

- Developed a fully functional CRUD application with React + Firebase to manage restaurant operations dynamically.
- Integrated an authenticated CMS Management System with Firebase backend.
- GitHub: [Repo Link](#) | Live Demo: [Dynamic Management](#)

## 5) CRUD Application

- Created a React.js application with Mock API integration to handle full CRUD functionality (Create, Read, Update, Delete).
- Designed for efficient data management and user-friendly UI.
- GitHub: [Repo Link](#) | Live Demo: [CRUD App](#)

## 6) Weather Searching App

- Developed a React-based application using OpenWeatherMap API to fetch and display real-time weather data.
- Displays city-specific temperature, humidity, and conditions.
- GitHub: [Repo Link](#) | Live Demo: [Weather App](#)

## 7) Utility App

- Created a text utility tool in React.js for text transformations (uppercase, lowercase, capitalization).
- Focused on simplicity and usability.
- GitHub: [Repo Link](#) | Live Demo: [Utility App](#)

## 8) Mobileotronics (E-Commerce Website)

- Designed a mobile e-commerce website using HTML, CSS, JavaScript, and Bootstrap.
- Implemented a clean, responsive layout for product showcasing.
- GitHub: [Repo Link](#) | Live Demo: [Mobileotronics](#)

## Certification
