## Profile Summary

Mobile Application Developer with 2 years of hands-on experience in designing and developing cross-platform mobile applications using Flutter and Dart. Skilled in crafting responsive, user-friendly, and high-performance apps with clean architecture and scalable code. Proficient in state management, REST API/Firebase integrations, and database handling. Actively seeking opportunities to contribute to a dynamic development team, enhance my technical expertise, and advance my career as a Software Developer.

## Professional Experience

### Flutter Mobile App Developer

Orion Techz – Hafizabad, Pakistan | 2024 – Present

- Debugged, fixed errors, and updated existing mobile applications.
- Developed mobile apps based on client requirements with focus on scalability.
- Implemented GetX state management for efficient performance.
- Designed smooth animations for widgets and screen transitions.
- Handled data caching using Hive and SQLite databases.
- Integrated REST APIs for dynamic data handling.
- Worked with Firebase (Realtime DB, Cloud Firestore, Storage, Analytics, Crashlytics).

### Flutter Mobile App Developer

Solution Corridor – Hafizabad, Pakistan | 2022 – 2023

- Managed and architected mobile app projects end-to-end.
- Applied OOP principles for writing clean and maintainable code.
- Implemented Provider state management across multiple projects.
- Integrated various authentication methods: Google, Facebook, Apple Sign-In, OTP, Email/Password, and Anonymous login via Firebase.
- Worked on Firebase services including Authentication, Firestore, Realtime DB, Storage, Analytics, and Crashlytics.
- Managed app databases and optimized queries for better performance.
