FLUTTER DEVELOPER

Full Stack Flutter Developer with 2 years of experience building scalable mobile and web applications using Flutter, Node.js, Firebase, and MongoDB. Strong in cross-platform architecture, performance optimization, and real-time data handling. Proven success in deploying production apps to Google Play and Apple App Store.

PROFESSIONAL EXPERIENCE

Flutter Developer

Cotolore Enterprises LLP, Kochi

May 2024 – Present

Kealthy System – Full-Stack Food Delivery Platform

Flutter, Flutter Web, Firebase, Node.js, MongoDB, Google Maps, Razorpay, Realtime Database
Appstore , Playstore

- Built a complete food delivery ecosystem including User App, Delivery Partner App, and Admin Web Panel
- Developed the User App with Flutter for browsing, ordering, and paying for healthy food products
- Integrated Firebase Services with OTP, Razorpay payments, live tracking via Google Maps, and real-time updates
- Created a Delivery Partner App for managing assigned deliveries, with push notifications and route guidance
- Built a Web-based Admin Panel for managing products, assigning deliveries, and tracking real-time deliveries
- Designed and hosted a custom Node.js backend with Express and MongoDB, integrated with Firebase services
- Achieved seamless synchronization across all platforms using Firestore and Realtime Database
- Successfully deployed the Kealthy app on both Google Play Store and Apple App Store

DD-Grab – E-commerce Platform

Flutter, Node.js, Cashfree

- Built a multi-category shopping experience (fashion, gadgets, accessories) with a Flutter app featuring smooth catalog browsing, powerful filters, wishlists, cart, checkout, and real-time order tracking with clean, scalable state management.
- Developed a Node.js backend exposing REST APIs for products, categories, cart, orders, users, coupons, and returns, with robust validation, authentication/authorization, and idempotent order flows for reliability.
- Integrated Cashfree Payment Gateway with server-created orders and payment_session_id, in-app checkout via the Flutter SDK, and server-side verification to ensure secure, compliant, and seamless payments across environments.

TECHNICAL SKILLS

- Languages: Dart, JavaScript, C++
- Frameworks: Flutter (Mobile & Web), Riverpod, Provider, Bloc
- Backend: Firebase, Node.js, REST APIs
- Databases: Firestore, MongoDB
- Tools & Services: Git, Postman, Google Maps, Razorpay, Fast2Sms, Cashfree
- AI & LLMs: Advanced, hands-on use of ChatGPT, Perplexity, Grok, and Claude for code generation, debugging, API workflow design, documentation, research with cited sources, and rapid prototyping in Flutter/Node.js environments.

EDUCATION & CERTIFICATIONS

Bachelor of Technology (B.Tech)

FISAT, Kochi | 2018 -2022

LANGAUAGES

English, Malayalam, Hindi, Tamil
