0341-9444048 ◇ Karachi, Pakistan

OBJECTIVE

MERN Stack Developer with hands-on experience in JavaScript, TypeScript, and modern web frameworks. Passionate about building scalable, real-time applications for web and mobile platforms that automate workflows and deliver exceptional user experiences. Skilled in developing robust, maintainable solutions that optimize business processes. Strong problem-solving, analytical, and communication skills, with a proven ability to thrive in both independent and collaborative environments.

EDUCATION

Bachelor of Software Engineering, Indus University — Karachi

CGPA: 3.5

SKILLS

Languages	JavaScript, TypeScript
Frameworks	MERN (TypeScript), Next.js, Tailwind CSS, Shadcn UI
State Management	Zustand, Redux Toolkit
Auth	Auth.js, Clerk
Tools	Git/GitHub, Zod, Docker, Sanity CMS
Databases	SQL, NoSQL, Prisma, Drizzle
Real-Time	Socket.io, WebSockets

PROJECTS

Virtual Assistant for Home Automation (Python, gTTS)FYP

- Built a virtual assistant using Python and gTTS to interpret and respond to voice commands.
- Simulated control over smart home devices through natural language processing.
- Led the project architecture and team coordination as Project Manager and Lead Developer.

E-Commerce Platform (Next.js, Stripe, Sanity)

- Built a modern, scalable platform using Next.js 13+, Sanity CMS, Clerk for authentication, and Stripe for payments.
- Enabled real-time content updates with Sanity and secure Stripe-based checkout flows.
- Designed a responsive, mobile-first UI using Tailwind CSS and Shadcn UI components.

AI Car Market (Next.js, AI APIs)

- Developed an AI-powered car marketplace with NLP and image recognition for intelligent search and listings.
- Integrated server-side rendering in Next.js for SEO optimization and dynamic content handling.
- Built intelligent pricing suggestions using custom logic based on car attributes and market trends.

Music Streaming App with Chat (Next.js, MERN, Socket.io)

- Created a Spotify-style music platform with real-time chat using Socket.io and persistent messaging.
- Enabled user authentication and playlist management with Clerk, Express, and Mongoose.
- Used Zustand and React Query for efficient state management and Shadcn UI for responsive design.

CERTIFICATIONS

- Web and Mobile Developer — Geeks of Kolachi
