## FULL STACK DEVELOPER

---

As a MERN-stack developer with two years of hands-on experience, I have developed expertise in a variety of technologies, including **React.js**, **Next.js**, **React Native**, **Node.js**, **Express.js**, **MongoDB**, and **TypeScript**. I have successfully contributed to a variety of projects, including **E-commerce platforms, dynamic websites, CRMs, ERPs, and portals**. My current role has allowed me to work on diverse projects across different industries, honing my skills in both front-end and back-end development. I have also developed a strong ability to prioritize tasks and manage time effectively, ensuring the timely completion of projects while maintaining the highest standards.

## TECHNICAL SKILLS

---

<b>Frontend</b>	: Next.js, React.js, React Native, JavaScript, TypeScript, HTML, CSS, Bootstrap, Tailwind CSS, MUI, Redux Toolkit, Axios, Tanstack/react-query
<b>Backend</b>	: Node.js, Express.js, Socket.IO

<b>Dev Tools</b>	: Visual Studio Code, Git, GitHub, Postman, Jira, Nginx, MongoDB Compass
<b>Deployment</b>	: AWS, Netlify, Amplify, Render, Vercel, Digital Ocean
<b>Testing</b>	: Jest
<b>Design</b>	: Figma, Moon Modeler, DbSchema

## PROFESSIONAL EXPERIENCE

---

### Fullstack Developer | **Qsales Trading** (Nov 2023 – Present)

- **Qsales**: An **E commerce** where users can browse and purchase products effortlessly.
- Integration with **Shopify** for fetching products, listing them, and managing the cart functionality.
- Integration with **Firebase push notification** to announce new products and special offers.
- **Qdelivery**: An ERP application featuring an admin panel, delivery team mobile app.
- In this admin panel, various types of users can log in, each with different levels of access and permissions.
- In the dashboard, there is a map view that displays a location-based drivers current location.
- Integration with **Google Map Api** for show delivery team travelled routes for admin panel.
- Route optimization that provides drivers with the most efficient routes.
- In the delivery application I created, CSGI is utilized to fetch accurate coordinates for delivery locations. Once the driver completes an order, the system automatically updates the order status in Shopify, marking it as fulfilled. This seamless integration ensures real-time updates and efficient order management.
- Integration with **Google Maps API** in React Native to display the tour plan map.
- Technologies used : **Next.js, React Native, TypeScript, Tailwind CSS, MUI, Bootstrap, Tanstack/react-query, Axios, Node.js, Express.js, MongoDB, Mongoose, JSON Web Token (JWT), NextAuth.js**

### Junior Full Stack Developer | **Brototype??** (Sep 2022 - Sep 2023)

- Developed and maintained web applications using **React.js, Node.js, Express.js** and **Monogodb**.
- Collaborated with cross-functional teams to deliver high-quality software solutions.
- Gained hands-on experience in **front-end** and **back-end** development
- Improved debugging and problem-solving skills
- Contributed to code reviews and project documentation.

## EDUCATION

---

BCA - Bachelor of Computer Applications (Present)
