## Profile

A passionate and detail-oriented Software Engineering graduate with a keen interest in Software Quality Assurance (SQA). Strong understanding of QA fundamentals, including test case writing, bug reporting, and software life cycle. Hands-on experience in manual testing, basic web development, and tools like Postman for API testing and JMeter for performance testing. Familiar with WordPress customization and ensuring functionality, usability, and responsiveness of websites. Eager to contribute to a dynamic QA team and grow as a quality-focused IT professional.

## Education

**BS Software Engineering**, Indus university Karachi

2021 – 2025  
karachi, pakistan

## Work experience

### Word Press Development Intern

Hyper Tech Verse Sep,2024 – Nov,2024

- Assisted in designing, developing, and maintaining WordPress websites.
- Customized themes and plugins to enhance website functionality.
- Optimized website performance and improved SEO practices.
- Gained hands-on experience in WordPress development, Elementor, and website security.

### Final Year Project – MediSense AI
