Transferable Work Visa

Riyadh, Saudi Arabia

About Me

I am a skilled Software Engineer with a strong background in Flutter, Firebase, and GraphQL. Since 2019, I have been dedicated to creating cross-platform mobile and web applications with Flutter, from designing pixel-perfect UIs to solving complex technical challenges.

Work Experience

Senior Flutter Developer | Project Manager

Saudi360 Inc. Riyadh

Sep 2022 to Present

- Led teams to successfully deliver high-quality applications, ensuring projects met client needs and were completed on time.
- Managed project planning, resource allocation, and communication with stakeholders.
- Developed user-focused mobile applications using Flutter for Android and iOS, with attention to UI/UX, backend integration, and rigorous testing for quality and performance.
- Managed the complete project lifecycle for innovative technology solutions, such as NFC-based systems for secure contact sharing and access control.
- Worked closely with clients to understand their needs and deliver tailored solutions.
- Maintained feedback channels to ensure projects stayed aligned with client expectations.
- Established and maintained high standards for code quality, security, and testing.
- Performed debugging and performance improvements to ensure reliable applications.

Flutter Mobile Application Developer

Sigi Technologies

Jan 2021 to Aug 2022

- Developed and deployed Flutter applications for Android and iOS platforms.
- Worked closely with clients to understand their requirements and deliver customized solutions.
- Integrated third-party libraries and APIs to enhance app functionality.
- Conducted thorough testing and debugging to ensure high-quality deliverables.

IT Support Engineer

IESCO | Islamabad

Jan 2019–Dec 2020

- Part-time IT Support Engineer installing and maintaining computer hardware and software, providing technical support to users' network.
- The training of staff, daily administration, monitoring, and diagnosis of network problems throughout the organization.
- Supporting the IT department's deployment and maintenance of network technologies.

Education History

Bachelor of Science in Software Engineering

National University of Modern Languages, Islamabad

Feb 2017 - Jan 2021

Intermediate in Computer Science

Institution: BISE Gujranwala

Aug 2014 - Aug 2016

Projects

Kafalah NFC System

Led and completed this project as Project Manager, developing an NFC-based system for sharing contact information and managing door access.

This solution provides streamlined, secure facility access and contact exchange for participants.

KAFFD E-Cards

Developed a digital business card system for the King Abdullah Financial District (KAFFD).

The admin uploads employee information to the server and writes it on NFC cards.

All things on the NFC card and QR remain dynamic.

Admin can change the information at any time.

Admin can also upload the bulk of employees with the help of a CSV file

Banque Saudi Fransi QR Card (BSF QR Card)

Designed and implemented a secure QR Card System for Banque Saudi Fransi to streamline access to contact information and resources.

Deployed the system on an STC virtual machine, ensuring high availability and security.

Enabled employees to use personalized QR cards, facilitating seamless and efficient information sharing.

Integrated the QR card system with existing bank infrastructure, enhancing accessibility and operational efficiency.

Provided a secure, convenient solution for Banque Saudi Fransi staff and clients to access essential resources.

Cruise Saudi E-Card

In the Cruise Saudi E-Card App, we can share the E-Business Card using Apple Wallet.

The app can also read and write NFC tags and cards.

You can write your Business Card data on the NFC card and share your information by tapping on any supported device.

Bright Car Wash

In this app, customers can create a request for a car wash.

Customers can select an interior or exterior car wash and select their location.

Employees will come to the location of the customer for a car wash.

This thing is working in Riyadh in 11 districts.

Antrak

Send your parcels across the country.

Anyone can place a delivery request by entering the size and weight of the parcel.

Delivery fee will be charged according to the volume, weight, and distance.

Drivers will be on your doorstep. Currently, this app is working in Dallas, USA.

On the driver-side application, the driver can accept jobs at a desired distance.

Relevant Skills

- Flutter
- Kotlin
- Java
- Getx
