Location: Saudi Arabia

ABOUT

As a dedicated cybersecurity professional with over 8 years of progressive experience in internet filtration, network security, cybersecurity, and IT infrastructure, I bring a proven track record of safeguarding digital ecosystems while optimizing operational efficiency. My career has been defined by a relentless focus on innovation, compliance, and leveraging cutting-edge automation to solve complex challenges.

EXPERIENCE

- **Internet Operations Filtration Expert, CCC (Contracted with CST)**
Mar 2024 - present
 - Managing and securing internet traffic, ensuring compliance with cybersecurity regulations.
 - Assisted in deploying new cybersecurity policies to strengthen internet security protocols.
 - Designed custom automation scripts for data analyzing, collection and reporting, reducing analysis time by 70%.
 - **Internet Operations Filtration Expert, Kafa'at Business Solution (Contracted with CST)**
Mar 2022 – Mar 2024
 - Monitored and analyzed Phone apps traffic and generate reports.
 - Generated comprehensive daily, weekly, and monthly reports, improving internet traffic analysis and filtration effectiveness.
 - Collaborated with IT teams to implement security best practices and optimize existing filtration systems.
 - **Information Security Technician, Sahab National (Contracted with CST)**
Jan 2019 – Mar 2022
 - Analyzed, and restrict certain internet traffic and prevent access.
 - Conducted in-depth traffic assessments to detect and analyze newest internet protocols.
 - Generated detailed analytical reports, providing insights to improve filtration measures.
 - **Help Desk, Al Athamina Commercial Services**
Jan 2016 – Jan 2019
 - Provided IT support via chat, email, and phone, assisting 500+ users with technical issues.
 - Ensured optimal system performance, troubleshooting network and software problems.
-

EDUCATION

- **BACHELOR'S IN CYBER SECURITY** - College of Telecommunication and Information
Dec 2021 – Feb 2024
 - GPA: 4.12
 - Relevant coursework: CCT, PENTESTING, DIGITAL FORENSICS
 - Relevant Certificate: Security +
- **DIPLOMA IN NETWORK SYSTEMS ADMINISTRATION** - College of Telecommunication and Information
June 2016 – Aug 2018
 - GPA: 3.8
 - Relevant coursework: CCNA

CERTIFICATIONS

- CompTIA Security+ (2024)

COURSES

- GRC (2025)
- PMP (2025)
- CCT (2023)
- CCNA (2021)
- DNSSEC (2021)

ACHIEVEMENTS

- Developed and deployed a web-based server, reducing workflow inefficiencies and improving team productivity by 50%.
 - It double checks the work done and helps to clean up old requests. (Workflow is confidential)
- Created an Excel project for data management, enabling team collaboration and generating insightful reports.
 - It's centralized and it distributes data to multiple files for reporting purposes.
- Built a DNS server for data analysis and reporting.
 - It enables the team to record and prevent certain data for testing purposes.
- Built a home server configured with best practices, enhancing security and performance.
 - Helps me to be creative and productive and up to date while creating new projects and inventions.

SKILLS

Soft:

- Problem Solving
- Analytical Thinking
- Decision Making
- Leadership
- Communication
- Time Management

Technical:

- Information Security
- Network Security
- Penetration Testing
- Digital Forensics
- Python, JavaScript, HTML, CSS
- Secure Coding

Interests:

- Machine Learning
- Ethical Hacking
- Open Source
- Constant Developing
- Experimenting
- Home Lab Setup

- Creativity
- Innovation

- Dealing with various Linux OS
- Linux & Windows Security

- Automation
- Scripting
