EXPERIENCE

Software developer

Webellero Software Development Agency

01/2017 – 06/2018, Ferizaj, Kosovo

- Worked for Webellero for more than a year, main technology stack we used was PHP with Laravel Framework and with Javascript(jQuery, pure Javascript, Vuejs) and for front-end (Bootstrap 3, Bootstrap 4, Tailwind) etc.
- Webellero was my first job as Developer and I had great experience there with very friendly colleagues.
- As for the environment I used Windows, Xampp, MySQL, Git bash, GitHub Desktop, Visual Studio Code, Adobe XD.
- Engineered and deployed multiple web applications using PHP with Laravel, integrating modern front-end frameworks like Vue.js and Tailwind to enhance functionality and user experience for diverse client projects.

Web developer

BEO LLC

07/2018 – 09/2019, Ferizaj, Kosovo

- Worked as a full-stack developer for over a year, I mainly work with Laravel and Vuejs.
- With Laravel, I've sorted out a lot of problems or worked on new features as requested.
- I think I'm very skilled at debugging.
- I am experienced in using Vuejs which I consider to be a very good framework that can be easily implemented within the Laravel framework and gives applications a user-friendly r-friendly look.
- At BEO we had used Gitlab for version control, Redmine for tasks as well as Gitlab Issues, Windows Servers as well as Ubuntu Servers as environments.
- Engineered modular full-stack solutions using Laravel and Vue.js, integrating version control with GitLab and managing workflows through Redmine to consistently deliver robust features across both Windows and Ubuntu environments.
- Refined API integrations between Laravel back-end and Vue.js interfaces, utilizing asynchronous operations and secure authentication protocols to heighten application reliability and responsiveness.

Web developer

Dietz

September 2019 – July 2022, Ferizaj, Kosovo

- I've have worked as a full-stack developer for almost a year.
- In Dietz, I've been busy with different issues such as search issues, converting data to different erent platforms such as Excel, Word, PowerPoint, front-end back-end performance issues.
- Resolved cross-platform data export challenges by developing seamless conversion tools for Excel, Word, and PowerPoint, enhancing accessibility and user experience across multiple formats.
- Streamlined front-end and back-end processes by addressing search function inefficiencies and optimizing data retrieval, leading to smoother user interactions and reduced system latency.
- Modernized legacy codebase by integrating updated frameworks and refining UI components, elevating system reliability and maintainability for ongoing projects at Dietz.

Software developer

CU-TA Solutions GmbH

07/2022 – 04/2023, Filderstadt, Germany

- Solving Issues: I identify and solve various issues related to search functionality, data conversion, and front-end/back-end performance.
- Platform Conversion: I am responsible for converting data to different platforms such as Excel, Word, and PowerPoint, ensuring that the data is accurately represented on these platforms.
- Framework Expertise: I have expertise in Laravel Framework and use it to develop efficient and scalable web applications.
- VueJS and NuxtJS: I am highly skilled with VueJS and NuxtJS and utilize these frameworks to develop robust front-end applications that are responsive and user-friendly. friendly.
- InertiaJS: I leverage the benefits of InertiaJS to develop SPA (Single Page Applications) with the help of VueJS.
- Server Management: I am adept at managing Linux servers and ensuring that the servers are up and running efficiently to support web applications.
- Database Management: I manage complex database relations, ensuring that the data is accurate, consistent, and secure.
- Docker Environment: I use Docker as my daily environment and ensure that the development environment is consistent and reproducible across different machines.
- Clear Code: I write clear, concise, and maintainable code, ensuring that the code is easy to understand and debug.
- Testing: I use Laravel's TDD to test the applications and ensure that they are functioning as intended, detecting and fixing any issues that arise during testing.

Software developer

Proxify AAB

04/2023 – 11/2023, Sweden

- Developing and optimizing front-end components using Vue.js, ensuring high performance and responsiveness.

- Collaborating closely with design and back-end teams to integrate APIs, enhancing seamless user experiences.
- Implementing state management effectively with Vuex(), improving the application's maintainability and scalability.
- Creating reusable and modular components, emphasizing clean, efficient, and maintainable code.
- Conducting thorough code reviews and ensuring adherence to best practices, enhancing overall project quality.
- Actively participating in agile methodologies, contributing to sprint planning, stand-ups, ups, and retrospectives.
- Utilizing modern front-end build tools and workflows, including Webpack, to optimize development processes.
- Integrated automated unit and end-to-end testing frameworks into the development workflow, strengthening code reliability and supporting continuous deployment at Proxify AAB.

Web application developer

Conroo GmbH

11/2023 – Current, München, Germany

- Developing and enhancing sophisticated front-end interfaces with Vue.js, consistently optimizing for performance and usability.
- Collaborating extensively with UX/UI designers and back-end developers to seamlessly integrate front-end components with APIs, ensuring smooth and intuitive user interactions.
- Leveraging advanced state management techniques with Vuex to efficiently handle complex application states and data flows.
- Implementing modular, scalable, and reusable components, prioritizing clear documentation and maintainable code structure.
- Conducting comprehensive testing and debugging to identify and resolve performance bottlenecks, ensuring reliability across diverse platforms.
- Participating proactively in Agile development practices, including regular sprint reviews, planning sessions, and continuous improvement processes.
- Employing advanced tooling, such as Webpack and modern JavaScript frameworks, to streamline the development workflow and facilitate continuous integration and deployment.

EDUCATION

Diploma of High School

Mehmet Akif College • 05/2017

- string.

Computer Science and Engineering

Universum • Ferizaj, Kosovo • 04/2023

- string.

AWARDS & HONORS

In English Summer School

Faba Learning Center • 2015

- In English Summer School.

MacPRO Competition. Third Place Winner of MACPRO 2016

Mehmet Aif College • 2016

- Project: Wordpress WebPage.

MacPRO Competition. Third Place Winner of MACPRO 2017

Mehmet Aif College • 2017

- Project: Online Examination App.

SKILLS

PHP, Laravel, Javascript(jQuery, pure Javascript, VueJs), VueJs and NuxtJs, InertiaJS, Angular, JSON, XML, SQL, C++

Bootstrap 3, Bootstrap 4, Tailwind, Vuex

Linux servers, Server management with Linux servers, Database Management, Managing complex database relations

Docker, Gitlab, GitHub, Xampp, Vagrant, Docker, WampServer, MySql, Microsoft SQL Server, Workbench

Eloquent, Fullcalendar.js, Highcharts.js

English, Turkish, German
