## Objective

As a passionate and self-motivated fresh graduate with a strong foundation in mobile app development, I am seeking an opportunity to leverage my skills in Flutter to build innovative and efficient mobile applications. Eager to contribute to a dynamic team and grow my expertise in app development, I aim to apply my knowledge in Dart, Flutter, and related technologies to create user-friendly solutions.

## Skills

- Flutter
- Dart
- Firebase
- API requests
- GitHub

## Education

Bachelor of Computer Science, Modern University for Technology & Information      September 2023

## Courses

Flutter Diploma in Amit      9/2023 -2/2024.

## Projects

- **Jobs que App** (Got Certificate on it)  
Is a leading online job search engine that connects job seekers with employers across the country. It offers a wide range of features to help you find the perfect job, Tools: Flutter - API request
- **Contact App**  
Contact App is a Flutter application utilizing Riverpod for state management. Users can add, edit, and delete contacts, choosing between local or remote database storage. The app offers a simple interface for convenient contact management
- **Music App**  
This Flutter music app fetches and displays music from your device. It uses just audio for playback , on audio query to retrieve local files, permission handler for secure access, and Flutter bloc for efficient state management.
