

KAITO HAMADA

Kita Ward, Kyoto, 603-8035, Japan | +81 80-8377-2077 | kaito.hamada777@proton.me

Summary

I am a Senior Full Stack Developer with extensive experience in developing and optimizing interactive front-end components and APIs, resulting in significant improvements in user engagement and data retrieval efficiency. My career includes roles at **Statking**, **TotoClub**, **SECOM**, and **Q-Games**, where I have delivered over **30** successful projects using technologies such as **React**, **React Native**, **Next.js**, **JavaScript**, **Python**, and **TypeScript**. Key accomplishments include migrating legacy systems to modern databases, achieving high customer satisfaction, and implementing robust security measures. I hold a **Bachelor's degree** in Computer Science from the University of Tokyo.

Skills

- HTML5
- CSS3
- JavaScript
- TypeScript
- jQuery
- Bootstrap
- React
- React Native
- Angular
- Vue.js
- Next.js
- TailwindCSS
- Node.js
- Express.js
- Python
- Django
- PHP
- Laravel
- MongoDB
- PostgreSQL
- Firebase
- Supabase
- Rest API
- GraphQL
- CMS
- Azure
- AWS
- Jira
- Git
- JWT
- Ethereum

Experience

Senior Full Stack Developer | 01/2023 - 09/2025

Statking – California, United States

- Coordinated with **6 members** cross-functional (Frontend, Backend, and QA) team toward the successful launch of Betting App and Platform using **React**, **React Native**, **Next.js**, **NestJS**, **Tailwind CSS**, and **PostgreSQL**.
- Maintained consistent and clear communication with team members and stakeholders, ensuring alignment and understanding throughout the project lifecycle.
- Experienced in building and optimizing interactive front-end components and scalable back-end system using **REST APIs** and **GraphQL**.
- Ensured top-notch code quality, security, and cross-platform compatibility for web applications.
- Used **Agile** methodology and managed daily standups for **sprint** planning and to-do lists.
- Implemented Automated Payment System using **Stripe**.
- Deployed the project to **AWS** and managed **EC2**, **Route53**, and Load Balancer.
- Used **Git** for version control and **Jira** for managing of project workflows effectively.

SENIOR FRONT END DEVELOPER | 01/2022 - 12/2022

TOTO Club – Hong Kong

- Developed Betting Platform featuring sports betting, casino games, and slot machines using **Go**, **Next.js** with **GraphQL API** and real-time **WebSocket** integration.
- Implemented responsive design using **Tailwind CSS** and added **dynamic UI** interactions with **jQuery**, resulting in a smoother user experience across devices.

- Managed **5** simultaneous projects across various tech stacks, ensuring timely delivery.
- Spearheaded comprehensive testing procedures across browsers, devices, and operating systems, leading to a **40%** reduction in user-reported bugs post-launch and enhancing overall user satisfaction.
- Ensured **100%** on-time delivery of products to customer locations, exceeding client expectations.
- Developed high-quality code with over **90%** coverage using **React**, **Python**, **TypeScript**, and **MongoDB**, while integrating **REST APIs**.

Mid-Level Full Stack Developer | 08/2018 - 12/2021

SECOM – Tokyo, Japan

- Developed interactive front-end components and optimized APIs, increasing user engagement by **40%** and data retrieval efficiency.
- Migrated legacy systems to **MongoDB** and **Firebase**, improving data access speed by **30%** for over 1 million users.
- Achieved a **95%** customer satisfaction rate and earned management recognition for service excellence.
- Created dynamic data-driven web applications using **React**, implementing server-side logic to manage user authentication, data validation, and session handling, which improved data security and enhanced the user experience.
- Determined job priorities for multiple projects and communicated sequencing, priorities and timelines to entire team.
- Completed code debugging and implemented fixes to resolve problems based on priority system.

Junior Full Stack Developer | 08/2017 - 07/2018

Q-Games – Kyoto, Japan

- Assisted in the development of multiple website using **HTML**, **CSS**, **BootStrap**, and **jQuery**, contributing to both layout improvements and enhanced user interfaces.
- Supported the creation of customized charts in **D3**, incorporating interactive features like tooltips and animations to enrich data visualizations.
- Assisted in optimizing performance to ensure responsive, especially for applications managing larger datasets.
- Aided in routine maintenance tasks, including applying software updates to keep systems current and secure.
- Reviewed and validated code for structure, security, and compatibility across various browsers and devices.
- Monitored basic system functionality to maintain optimal performance, identifying and reporting any issues.
- Created simple unit tests for web application components, learning foundational testing practices.
- Participated in debugging sessions, implementing solutions for minor issues under guidance from senior developers.

Education and Training

University of Tokyo | Computer Science

04/2013 – 07/2017

Projects

Statking: React Native + NestJS + PostgreSQL – <https://statking.ai>

TOTO Club: Next.js + Golang + PostgreSQL – <https://totoclub.top>

Neopets: React + BlockChain - <https://www.neopets.com>
