ABOUT ME

As a skilled SQA Lead, I specialize in ensuring software quality by combining manual testing with automation tools like Cypress and security testing using OWASP ZAP. With over 4 years of hands-on experience in manual testing and 1.5 years in automation, I have successfully reduced testing cycles by 30% and increased software delivery efficiency across multiple projects. My technical expertise spans functional, security, performance, and compatibility testing for both web and mobile applications.

WORK EXPERIENCE

SQA Lead | Rapid Compute | Karachi | Nov 2023 - Present

- Developed and implemented automation test scripts in Cypress, reducing manual testing effort by 30%.
- Collaborated with cross-functional teams to resolve critical bugs, improving deployment process efficiency by 20%.
- Spearheaded security and performance testing, ensuring compliance with industry standards and boosting system reliability.
- Worked closely with development teams to address issues proactively, streamlining resolution processes.

SQA Engineer | RapidCompute | Karachi | Oct 2022 - Nov 2023

- Developed and executed manual and automated test cases for web applications.
- Reduced manual testing efforts by 30% through the introduction of Cypress automation.
- Integrated testing into the CI/CD pipeline, reducing deployment time by 20%.
- Performed API testing using Postman, ensuring smooth integrations across platforms.
- Collaborated with developers, designers, and product managers to resolve issues quickly, improving product quality.

SQA Engineer | ABIC | Karachi | Nov 2020 - Sep 2022

- Analyze user stories and documents to ensure comprehensive understanding.
- Design and execute detailed test cases based on user stories.
- Identify, document, and track bugs using Azure DevOps.
- Lead regression testing to validate bug fixes.
- Test ERP applications, focusing on HRMS, Sales, Learning, and Lease Management modules.
- Conduct testing on iOS and Android applications.
- Execute functional and non-functional tests manually.
- Verify API responses using POSTMAN.
- Engage in daily scrum meetings to support team objectives.
- Collaborate with business analysts to enhance user stories.
