## SUMMARY

Collaborative Software Engineer with about three years of experience building scalable web apps. Leverages expertise in PHP, MySQL, Laravel, Vue.js, Nuxt.js and DevOps tools (Docker, Jenkins, Git), and Agile practices. Focused on writing clean, efficient code and contributing to team success by aligning technical solutions with strategic business goals.

## WORK EXPERIENCE

Evotik Ltd (Remotely) | Full Stack Developer | Jun 2023 – Present

- Built SEO-optimized, high-performance web applications using Vue.js, Nuxt.js, and Laravel.
- Incorporated third-party APIs, (Stripe and OpenAI) to streamline workflows and advanced features.
- Utilized Docker, Git, and Jenkins for efficient CI/CD pipelines.
- Collaborated with cross-functional teams to deliver solutions aligned with business objectives.
- Provided mentorship and guidance to junior developers, reinforcing best practices and efficiency.

Beena (Giza, Egypt) | Full Stack Developer | Apr 2023 – Aug 2023

- Resolved API workflow challenges and integrated with Facebook Messenger for notifications.
- Improved app performance by 40% through eager-loading.
- Redesigned the admin dashboard to simplify order management and improve UX.

Code Clouders (Mansoura, Egypt) | Full Stack Developer Intern | Jan 2023 – Mar 2023

- Gained hands-on, working with Laravel for backend logic and Blade templates for frontend rendering.
- Merged pre-built dashboard templates, enhancing UI/UX and streamlining development processes.
- Assisted in building and maintaining both server-side and client-side components of web applications.

## EDUCATION

- Bachelor of Computer and Information Sciences | Mansoura University, Egypt | 2017 – 2021
- Full Stack Web Development Diploma (PHP) | ITI, Egypt | Nov 2022 – Mar 2023

## PERSONAL INFORMATION

- Date Of Birth: 09 June 1999
- Nationality: Egyptian
- **Visa Status:** Tourist Visa – Valid till [November, 2025]
- Marital Status: Single
- Military Service: Completed

## LANGUAGES

- Arabic: Native.
- English: Professional working proficiency.

## SKILLS

- Frontend: Vue.js, Nuxt.js, JavaScript, TypeScript, jQuery, HTML, CSS, Bootstrap, TailwindCSS.
- Backend: Java, PHP, Python, Node.js, Laravel, Express, NestJS, Mongo, MySQL, PHPUnit, RESTful APIs.
- Tools & Practices: Git, Docker, Jenkins, Redis, Nginx, Agile Development.

## PROJECTS

- AI-Powered Workflow Assistant System (EOM) | *Evotik Ltd* | Laravel, Nuxt.js, OpenAI
  - Architected and developed AI agents to assist the user with answering questions or him with daily routine.
  - Added an AI Router to dynamically initialize and orchestrate interactions between specialized agents.
  - Collaborated with leadership to align technical implementation with business requirements.
- E-Commerce & Inventory System ([IMakeup](#)) | *Evotik Ltd* | Nuxt.js, Laravel
  - Built a Saudi cosmetics marketplace with Nuxt.js and Laravel for inventory/order management.
  - Implemented an unofficial WhatsApp integration using WA API for order notifications and announcements.
  - Designed cart/order workflows and observers to synchronize inventory updates across multiple warehouses.
- Unified Business Management Platform ([InHub](#)) | *Evotik Ltd* | Laravel, Nuxt 3
  - Developed an AI-powered LinkedIn profile evaluator, using OAuth, which analyzes PDF/URL input and suggests improvements through OpenAI and Gemini AI models.
  - Refactored backend controllers to eliminate redundant cURL calls and introducing shared services.
  - Built a responsive frontend from scratch using Nuxt UI, implementing features like resume creating, life-time and recurrent payments using Cashier, Stripe.
- Freelance Gig Platform ([Huna](#)) | *Evotik Ltd* | Laravel, Nuxt.js 3, Stripe
  - Developed a Fiverr-like platform for freelancers, featuring Stripe integration for secure payments.
  - Implemented advanced SEO techniques, including sitemaps and Google Schema markup.
  - Built a robust backend with Laravel to handle gig management, user reviews, and transaction tracking.
- Multi-Tenant ERP System (Tuxedo ERP) | *Evotik Ltd* | Laravel, Multi-Tenancy, Google Merchant
  - Implemented a multi-tenant ERP system supporting multiple branches and warehouses.
  - Implemented multi-country pricing product prices dynamically based on country-specific pricing strategies.
  - Integrated Google Merchant for seamless product listing and inventory synchronization.
  - Managing POS, online stores, and inventory from a single site and a Real-time WebSockets communication.
  - Built reporting views to track sales performance, including insights on top-selling items, sales by branch, customer transactions, and revenue breakdown by payment method at each branch.
  - Developed an inventory transfer, for stock movement between warehouses maintaining accurate stock levels.
  - Logging detailed transaction, ensuring each item's movement is recorded for auditing and transparency.
- Leads Management System (GreenWay) | *Evotik Ltd* | Laravel, Vue 3, AWS
  - Built a platform, for visa applications, sent email campaigns with suppression lists and AWS integration.
  - Developed a dynamic frontend using Vue 3 Composition API and Vuetify 3 for a seamless user experience.
- Fast-Food Ordering System Upgrade | *Beena* | Laravel, Facebook APIs
  - Enhanced core API performance by 40% using eager-loading and optimized resource handling.
  - Integrated Facebook Messenger via Botman for real-time order tracking and customer engagement.
  - Used Google Maps to calculate the distance between the restaurant and customers to estimate fees and time.
- Freelance Projects | *MostaqI* | Laravel, Vue
  - Enhanced and added new features about the management using Firebase for a delivery app (One8) at KSA.
  - Optimized a construction equipment rental system, reducing backend response times by 50% using query caching and database indexing. Enhanced inventory tracking and customer payment workflows.
  - Maintained a Jira-like task management system (added role-based dashboards and automated reporting).
