MUHAMMAD HADI

ASP.NET Core Developer | C#

Experienced backend developer with 2+ years in building scalable web applications and payment systems, now transitioning expertise to ASP.NET Core, C#, and cloud-based solutions. Passionate about high-performance APIs and microservices.

Xint Solutions MYTM | Pakistan, Lahore

ASP.NET Core Developer (May 2023 – April 2025)

With over 2 years at Xint Solutions, I contributed to launching MyTM Corporate in Pakistan, developed MyPay for business clients, and supported BurqPay's expansion into the Saudi market. These projects were built using ASP.NET Core C#, allowing me to strengthen my expertise in developing secure, scalable digital payment solutions across diverse markets and business needs.

Xint Solutions MYTM | Pakistan, Lahore

Internship (Feb 2023 – May 2023)

I completed a dynamic 3-month internship at Xint Solution Company, where I contributed to various projects and focused on ASP.NET Core C# development. During the internship, I also gained hands-on experience working with JavaScript and Blazor for building interactive and modern web applications. My work was well-received, earning positive feedback from both my team lead and colleagues for my attention to detail and efficiency

July, 2023

Freelancing Part time

ASP.NET Core Developer

Currently working on dealsmadi.com, a freelance project developed using ASP.NET Core C#. The platform is designed as a classified ads website similar to OLX, providing a secure and user-friendly environment for buying and selling goods. This project showcases my skills in ASP.NET Core backend development, MySQL integration, and building scalable marketplace web applications.
