EXPERIENCE

LOVE FOR DATA (Product-based and Project-based Software Company)

Software Quality Assurance Engineer Intern

Karachi, PK
May 2025 – July 2025

- Performed manual testing on multiple projects, including Bayan Pey, Assertify Case Management, and Perfumes Portal.
- Created detailed test cases and conducted API testing using Postman for the Bayan Pey Admin Portal and Maidan Project.
- Utilized Zulip for Bug Reporting.
- Conducted smoke testing and sanity testing to verify application stability across builds.
- Collaborated with developers and other QA team members to ensure timely delivery and quality assurance.
- Performed exploratory testing on the Blink Project to identify usability issues, uncover hidden defects, and ensure overall software quality.

CERTIFICATIONS & TRAININGS

- **SFPC** by CertiPro (Scrum Foundation Professional Certificate)
- Understanding Agile and Scrum at a deeper level
- API Testing With Postman
- Software Testing Tutorial
- QA Fundamentals

PROJECTS: BAYAN PEY ADMIN PORTAL

The Bayan Pe Admin Portal is a centralized platform designed to streamline business operations. It allows admins to manage user onboarding, track orders, monitor repayments, and oversee deliveries efficiently.

- Designed and executed comprehensive test cases for the BayanPey Admin Portal to ensure system reliability and coverage.
- Performed Responsiveness Testing using a responsive testing tool to verify cross-device compatibility.
- Implemented Automation Testing using Cypress with the Page Object Model (POM) to enhance test reusability and maintainability.
