SUMMARY

Developer with strong experience in building cross-platform mobile apps and immersive game experiences. Skilled in Flutter, Android Java, and Unity, with a solid foundation in clean architecture, state management (BLoC, GetX, Provider), and backend systems using PHP (CodeIgniter) and MySQL. Proficient in creating interactive VR and mobile games using C# and Unity XR Toolkit, as well as integrating AI-powered NPCs and 360° content. Demonstrated track record of delivering high-quality applications, and winning in both local and global hackathons, with experience building scalable, real-time systems using Firebase and RESTful APIs.

EDUCATION

BSc Computer Science , Birzeit University, Birzeit - Palestine	July 2021 – July 2025
<ul style="list-style-type: none">GPA: 84.4/100Key modules: Object-Oriented Programming, Data Structures, Database Management Systems, Analysis of Algorithms, Computer Networks, Web Application and Technology
