## Web Developer

LinkedIn [muneebyousaf91@gmail.com](mailto:muneebyousaf91@gmail.com) +923435398700 Gujranwala Punjab, Pakistan

### Summary

Full Stack Web Developer with 4 years of professional experience in web development. Spent 2 years in front end development and 2 years as a Full Stack MERN developer. Skilled in building scalable web applications using React.js, Node.js, Express and MongoDB. Focuses on responsive interfaces, clean UI, and strong performance. Works closely with designers to deliver practical user experiences. Stays current with modern JavaScript (ES6+) trends and best practices. Delivers efficient and maintainable code that supports real product growth. Seeks a dynamic role that uses full technical capabilities and supports ongoing professional development.

### Skills

- Languages:** JavaScript (ES6+), PHP, HTML5, CSS3.
- Frameworks:** React.js, Node.js, Bootstrap, Tailwind CSS.
- Database:** MySQL, MongoDB.
- Tools:** VS Code Studio, Postman, Git, GitHub, WordPress.
- Deployment:** Versal, Netlify.
- Soft Skills:** Problem-Solving, Debugging, Communication Skills, Time management, Work Ethics.

### Experience

#### Web Development

03/2024 - 09/2025

Digital Nerd, Hyderabad

- I was responsible for delivering high quality solutions within tight deadlines.
- Built user interfaces with React focused on performance, responsiveness, and user experience.
- Developed scalable APIs using Node.js, Express, and MongoDB.
- Participated in designing and developing feature rich web applications.
- Worked with designers and QA engineers to support smooth project delivery under agile workflows.
- Wrote clean and maintainable code using best practices to improve stability and scalability.
- Stayed updated with modern development trends and integrated useful tools to improve productivity.

#### Front-End Development (MERN)

01/2023 - 02/2024

Phen Tech, Islamabad

- Developed web applications using PHP principles, including OOP, ensuring efficient coding practices.
- Managed databases with MySQL, optimizing project implementations for performance and reliability.
- Collaborated with cross-functional teams to optimize workflows and integrate third-party APIs.
- Demonstrated proficiency in front-end technologies such as HTML, CSS, JavaScript, and Bootstrap for a cohesive user experience.
- Managed version control using Git and contributed to team efforts on GitHub.

#### Web Development

02/2022 - 12/2022

NextGen Learners

- Assisted in designing and maintaining responsive websites using HTML, CSS, JavaScript, and React.js.
- Worked with senior developers to build frontend and backend features.
- Contributed to real projects and improved professional development skills.
- Tested features to ensure strong performance and smooth user experience.

# Education

---

**BS Computer Science**

09/2017 - 11/2021

Government College University, Faisalabad

## Projects

---

### **Cold Email Tool**

A cold email tool is a software solution designed to automate and streamline the process of sending personalized outreach emails to potential leads. It helps users manage contact lists, create email sequences, track open and response rates, and optimize campaigns for better engagement and conversions.

### **Online Voting System**

An online voting system using SMS OTP is a secure digital platform that allows users to participate in elections or polls remotely by verifying their identity through a one-time password (OTP) sent via SMS. This system enhances voter security, simplifies participation, and ensures fair, transparent, and tamper-proof voting processes.

### **Ecommerce Store**

An Ecommerce Store application offers features that help the user manage online sales with ease. The user manages products by adding prices, images, and stock. The user supports customer accounts and secure checkout. Customers use the shopping cart to review items before buying. Customers track their orders from purchase to delivery. The user monitors inventory to prevent stock issues. Customers use search and filters to find products quickly. The user runs discounts and coupons to increase sales. The layout works on mobile and desktop devices. The user uses an admin dashboard to view sales reports and customer activity.
