ABOUT ME

Junior Flutter Developer with hands-on experience in building **responsive, cross-platform mobile applications** using **Flutter** and **Dart**. Skilled in **RESTful API integration, Firebase services (Authentication, Cloud Firestore, Push Notifications), and state management (Provider, GetX)**. Experienced in designing **modern UI/UX**, implementing **local storage solutions (SQLite, SharedPreferences)**, and writing **clean, maintainable code**. Known for being a **fast learner with strong problem-solving skills**, eager to grow in a collaborative environment, and contribute to **scalable, real-world mobile solutions**.

WORK EXPERIENCE

🏢 *ZEM Services Limited*

Junior Flutter Developer

[04/2025 – 09/2025]

- Contributed to the development of mobile applications using **Flutter**.
- Implemented **Provider** for efficient state management.
- Utilized **SharedPreferences** for storing user data and preferences locally.
- Built and optimized **UI screens** to align with design requirements.
- Integrated **RESTful APIs** for dynamic data handling and user interactions.
- Collaborated with the team to enhance app performance and maintain code quality.

🏢 *Bashir Sons - Bus Ticket Booking App*

Flutter Developer (Freelancer)

[2025 – Current]

- Built a mobile application for bus ticket booking using **Flutter**.
- Implemented **GetX** for state management to streamline navigation and data handling.
- Integrated **SharedPreferences** for local data persistence (user login, preferences).
- Connected with **RESTful APIs** to fetch bus schedules, availability, and booking data.
- Developed features for user authentication and booking flow.
- Pending integration: **online payment gateway** and **bus search/booking module**.

EDUCATION AND TRAINING

Cross Platform Apps with Flutter
PSDI (Punjab Skills Development Initiative) [22/04/2025]

City: Faisalabad | **Country:** Pakistan

BS Chemistry
University Of Agriculture, Faisalabad [02/09/2019 – 13/06/2023]

City: Faisalabad | **Country:** Pakistan | **Website:** https://web.uaf.edu.pk/ | **Final grade:** 3.13/4.00

- Transitioned into **Computer Science and Software Development** through self-learning and practical projects.
- Hands-on experience in **Flutter, Dart, RESTful APIs, Firebase, Provider, GetX, SQLite,** and **SharedPreferences**.

PROJECTS

[2025 – Current]
Commune – Social Communication App (In Progress)
- • Currently developing a **social communication platform** using **Flutter** and **Dart**.
- • Implemented **GetX** for efficient state management across the app.
- • Integrated **Firebase backend services**, including **Authentication, Cloud Firestore, and Push Notifications**.
- • Building features for **real-time messaging, user profiles, and notifications**.
- • Ongoing work includes the development of advanced features and further **scalability enhancements**.

[2025]
Hayyana – Educational App for Chemistry Students
- • Developing an **educational mobile application** using **Flutter** and **Dart** to support chemistry students.
- • Implemented **GetX** for state management to ensure smooth navigation and data handling.
- • Built **interactive UI screens,** including a **periodic table** with detailed properties of chemical elements.
- • Currently expanding the app with additional **educational features, data visualization, and study resources**.
- • Focused on **responsive design, clean architecture, and scalable code structure**.

[2024]
Covid Cases Tracker
- • Developed a mobile application to track and display real-time **COVID-19 statistics** using a public **RESTful API**.
- • Implemented **search functionality** for users to look up cases by country/region.
- • Designed and built the **complete UI** with data visualization.
- • Ensured smooth user experience with optimized API calls and clean state handling.

Everything Tasks
- • Built a **task management application** using **Flutter** and **Dart**.
- • Implemented **local data storage** with **SQFLite** and **SharedPreferences** for persistent task management.
- • Developed features to **add, update, and delete tasks**, ensuring smooth data handling.
- • Designed a **modern UI** with clean architecture and responsive layouts for a seamless user experience.

Link: https://github.com/usamasufi/everything_tasks

Trackizer App UI Practice
- • Developed a collection of **modern, responsive UI screens** using **Flutter** and **Dart**.
- • Followed the **Provider with MVVM architecture** for clean code structure and scalability.
- • Implemented multiple screens, including **login/signup, add credit card, product lists, and profile screens**.
- • Focused on **UI/UX best practices**, responsive layouts, and reusable components.

SKILLS

Python (Basic to Intermediate) / Problem Solving / Clean Code Practices / Debugging & Testing / Communication / Team Collaboration / Adaptability / Time Management

Mobile App Development

Android Studio / VS Code / Dart / Flutter / Cross-platform App Development (Android & iOS)

State Management

GetX / Provider State Management / setState

Storage & APIs

Push Notifications / Firebase Authentication / Cloud Firestore / RESTful APIs / Firebase / SharedPreferences / SQFLite / HTTP Package / FutureBuilder

Tools & Version Control

Git / GitHub / Figma / Postman

UI/UX Development

Responsive Design / Material Design / Widget Customization

LANGUAGE SKILLS

Mother tongue(s): Urdu │ Panjabi; Punjabi
Other language(s): English

I am eager to contribute my skills as a Flutter Developer while continuing to learn and grow in a collaborative environment.
