Professional Summary

Software Developer with proven expertise in building cross-platform mobile applications using Flutter, Dart, and SwiftUI. Experienced in integrating RESTful APIs, Firebase services, and state management (GetX) to deliver high-performance apps. Skilled in UI/UX design, problem-solving, and agile collaboration, with hands-on experience creating full-stack mobile and IoT solutions. Recognized for developing scalable digital products that improve efficiency, enhance user experience, and support business growth.

Core Skills

- Mobile Development: Cross platform, IOS
- Backend & APIs: Firebase, RESTful APIs, Google Maps, Third-party libraries
- Programming: Dart, SwiftUI, C++, HTML, CSS
- Tools & Version Control: GitHub, Agile, VS Code, Xcode, MS Word, MS excel, MS PowerPoint
- Soft Skills: Communication, Problem-Solving, Leadership, Mentorship

Experience

Software Developer
SoftSol, Islamabad, Pakistan — Mar 2024 – Feb 2025

- Developed and deployed **5+** cross-platform mobile applications using Flutter & Dart, achieving smooth performance across Android and iOS.
- Built and customized **30+** reusable UI components, integrated 10+ APIs, and optimized app performance, reducing load times by **25%**.
- Collaborated with a team of **6** developers and designers to deliver client projects **15%** faster than planned deadlines.
- Resolved **100+** bugs and implemented feature enhancements, improving overall application stability and user satisfaction by **20%**.

Software Development Intern
SoftSol, Islamabad, Pakistan — Dec 2023 – Feb 2024

- Created small-scale Flutter projects with a focus on UI/UX and functionality.
- Contributed to SwiftUI-based iOS apps for seamless front-end experiences.

- Supported Agile processes, daily standups, and version control management.

Education

BS Information Technology

University Institute of Information Technology PMAS ARID, Rawalpindi, Pakistan (Oct 2020 – Aug 2024)

HSSC Pre-Engineering

Usheri Public School & College (2018 – 2020)

SSC Science

Hira High School (2016 – 2018)

Projects

- **CreasePro:** Developed a SwiftUI-based real-time game management & training app that enables coaches and players to schedule matches, track performance, and manage training sessions seamlessly ([CresePro](#)).
- **ArborNote:** Engineered a tree care management system with integrated CRM, scheduling, and invoicing features, helping service providers streamline client operations and improve efficiency ([ArborNote](#)).
- **SoftoTeam:** Designed and implemented an employee attendance, leave, and task management system, allowing organizations to monitor productivity, automate HR processes, and simplify workforce management ([SoftoTeam](#)).

Personal projects

- **News App:** Developed a full-stack Flutter & Firebase application integrating a news API, user authentication, and profile management to deliver personalized content.
- **Live Tracking Scheduling & booking:** Designed and implemented a real-time booking and scheduling system using Flutter and Firebase, enabling efficient ride management with location tracking.
- **SenceLife:** Built an IoT-based health monitoring system with Raspberry Pi to track ECG, blood pressure, and temperature, improving real-time patient health insights.
- **SoftoBook:** Created a financial accounting application with API-based report generation, enhancing business decision-making through automated reporting.
- **Sath-Chaly:** Developed a carpooling and ride-sharing platform in Flutter, allowing users to book empty seats and reduce travel costs.
- **JustOffice:** Designed and developed a service marketplace platform that connects skilled labor with customers, integrating booking, gig management, and profile features to simplify hiring processes.
