Summary

Adaptable and multi-skilled developer with hands-on experience in mobile app development (Flutter), WordPress website creation, and front-end development using React JS. Skilled in building user-friendly, responsive applications and websites with basic backend integration. Also experienced in managing content, optimizing performance, and ensuring clean UI/UX. Strong problem-solving, learning, and collaboration skills, with a passion for delivering impactful digital solutions and growing in fast-paced, tech-driven environments.

Skills & Expertise

Front-End:
Flutter, Dart, React JS, WordPress, Google Maps API , UI/UX Design, State Management.

Back-End
Firebase, REST APIs, FireStore, Push Notification, Node JS (Basic), FastAPI (Basic)

Tools & DevOps:
Git, GitHub, Postman, VS Code, Swager, Xcode, HomeBrew, Jira

Soft Skills:
Problem Solving, Adaptability, Teamwork, Communication

Work EXPERIENCE

WordPress Developer | LDC Saudi Arabia | April 2025 - Present

- Designed and developed the complete company website using WordPress.
- Customized themes, created responsive layouts, and ensured cross-browser compatibility.
- Integrated contact forms, galleries, and interactive sections to enhance user experience.
- Maintained the website for three months, resolving bugs and updating content regularly.

Mobile App Development (Flutter/FlutterFlow) | Canary Calnetics | Aug 2023 - Feb 2025

- Built and deployed full-featured mobile apps using Flutter and FlutterFlow
- Worked on UI/UX design, state management, and API integration
- Integrated Firebase (Auth, Firestore, Notifications), Stripe for payments, and real-time features
- Used FlutterFlow for rapid development of MVPs with custom actions and Firebase backends
- Published and maintained apps across Android and iOS platforms

Backend Tasks (Python/FastAPI) | Canary Calnetics | Aug 2023 - Feb 2025

- Created and tested REST APIs using FastAPI for mobile and web apps
- Handled database connections, CRUD operations, and admin authentication
- Integrated backend services with Firebase and third-party APIs

Key Projects

Canary Safety App – Emergency Alert System - (Flutter, Firebase)

- Developed a cross-platform mobile app for emergency alerts using Flutter and Getx State management
- Integrated Firebase for real-time notifications, cloud storage, and live location sharing
- Implemented device sensors (shake detection) with GetX for triggering safety alarms
- Designed intuitive UI/UX for quick access to alerts, emergency contacts, and safety messages
- Published on Google Play Store and App Store with positive user feedback and performance optimizations

Trips.pk – Travel & Booking App (Flutter, Figma, REST APIs)

- Designed and developed a complete hotel booking and travel consultancy app from scratch using Flutter
- Integrated RESTful APIs for hotel listings, flight bookings, and visa consultation services
- Implemented secure payment gateways, email notifications, and push notifications using Firebase
- Conducted end-to-end testing, debugging, and performance tuning to ensure app reliability
- Published on Google Play Store with a focus on smooth user experience and stable transactions

Storibee – AI-Based Storybook App with Voice & Subscription

- Enabled users to record storybooks in their own voice or generate them using AI voice tools
- Integrated AI to suggest books and personalized playlists based on user preferences
- Allowed users to create custom playlists and request story recordings from others
- Integrated Stripe for secure in-app purchases and subscription management
- Built and maintained an admin panel to manage stories, users, and playlist content

Leaders Development Company – Corporate Website (WordPress)

Developed a fully customized company website using WordPress to showcase services, achivements, and job opportunities.

- Designed and built a responsive website from scratch, tailored to the company's branding
- Created custom pages for Company Introduction, About Us, Job Postings, Gallery, and Contact Us
- Integrated contact forms, location map, and job application sections for easy interaction
- Optimized site performance and implemented basic SEO for better visibility
- Maintained and updated the website regularly for 3 months, ensuring smooth operation and fresh content
