Personal Profile

I am a Computer Science student with a strong interest in frontend development, focusing on React.js. I have experience building interactive web applications and integrating tools like Redux, Material-UI, TaiwindCss, and Axios. During my internship, I worked on real-world projects, enhancing my skills in creating seamless user experiences. I am eager to collaborate on impactful projects, learn from experienced developers, and grow in a professional environment.

Education

COMSATS UNIVERSITY ISLAMABAD, WAH CAMPUS   *Wah Cantt, Rawalpindi*

BS in Computer Science

• **Courses:** Web Development, Programming Fundamentals, Object Oriented Programming, Data Structure and Algorithm, Software Project Management, Artificial Intelligence, Human Computer Interaction

PUNAB COLLEGE SARGODHA   *Sargodha, Punjab*

ICS

• **Subjects:** Computer Science, Math, Physics, English

Experience

Glaxit

React Js Internee

Working as a React.js Developer Intern, where I am contributing to real-time client projects focused on frontend development. My role involves creating responsive user interfaces, enhancing performance, and ensuring a smooth user experience across all devices. I collaborate with the team to implement reusable components and follow best practices in modern frontend development. This experience is helping me improve my skills in React.js, JavaScript, and working in a collaborative environment.

Projects

Real Estate Website

Using Reactjs and CSS

• Built a real estate website using React.js and CSS with a responsive design and smooth navigation. Implemented dynamic search and filtering for better user experience. Focused on reusable components and interactive UI elements to enhance usability and engagement.

Weather App Website

HTML, CSS, Bootstrap, JavaScript and React.js

• Built a weather app using React.js that allows users to view real-time weather information based on their location. Integrated an API to fetch weather data and displayed it in an easy-to-understand format. Focused on creating a responsive design for a seamless experience across devices.

Blog Website

Using Reactjs, and Bootstrap

• Developed a blog website using React.js where users can create, read, update, and delete blog posts. Implemented a clean, responsive layout and integrated features like user authentication and post management. This project helped me improve my skills in React.js and working with RESTful APIs

Tour and Travel Website

Using Reactjs, Material UI and Bootstrap

• Developed a Tour and Travel website using React.js, where users can explore various travel destinations and book tours. Integrated features like user authentication, tour booking forms, and a responsive design for a seamless browsing experience. Focused on providing an interactive and user-friendly interface to enhance the customer experience. This project helped me improve my skills in React.js and working with dynamic content.

Gym Website

Using Reactjs, CSS

• Developed a responsive gym website using React.js and CSS, incorporating React hooks and Framer Motion for smooth animations. Integrated EmailJS for contact functionality, enhancing interactivity and practicality.

Skills

Programming Languages and Database	JavaScript , Python, C++, Java , SQL, MongoDb.
FRAMEWORKS and LIBRARIES	Reactjs | Bootstrap | Redux | MaterialUI | TailwindCss
Soft Skills	Time Management, Teamwork, Problem-solving, Documentation, Engaging Presentation.
