SUMMARY

A skilled Flutter developer with over 3 years of experience building cross-platform mobile applications. Proficient in integrating Firebase for real-time databases, authentication, and cloud storage. Expertise in state management techniques, including Provider, GetX, and Bloc, to ensure scalable and maintainable app architectures.

EDUCATION

Saurastra University

- Bachelor's Degree in Bachelor of science (IT) 2019 – 2022

HSC

- VPG High School

SKILLS

- I have experience connecting apps to servers using REST APIs, making sure data flows smoothly between them.
- I know how to use Git and GitHub to keep track of code changes and work well with a team.
- I write neat and easy-to-understand code that follows good rules and is simple to update later.
- I build app screens that look good and work well on all types of devices and screen sizes.

HOBBIES

- Enjoy playing snooker to unwind and sharpen focus.
- Passionate about exploring new places and cultures.
- Curious about emerging technologies and always eager to try out new tools and frameworks.

PROFESSIONAL EXPERIENCE

Infopulse Technologies

Indian Company based on Ahemdabad (Jul 2024 - Current)

- Utilized BLoC state management to create efficient, scalable, and testable solutions.
- Developed responsive, pixel-perfect UIs with attention to cross-platform design principles.
- Designed and implemented clean architecture with modular code structure.
- Worked on AI features, push notifications, mixpanel analytics, and various other app modules.

Flitzen Technologies

Indian Company based on Rajkot (Oct 2022 - Jun 2024)

- Problem-solving skills for debugging and troubleshooting.
- Familiarity with RESTful APIs and asynchronous programming.
- Experience with version control systems like Git.
- Creativity and attention to detail for designing and implementing UI/UX.
- Worked on Firebase services including Authentication, Firestore, Realtime Database.

Technocloud Technologies

Apr 2022 - Sep 2022

- Understanding of mobile app design principles and guidelines for creating UI Conducted research and prepared reports on various topics related to the company's operations and industry trends.
- Basic understanding of state management options in Flutter, such as setState,Provider, or GetX.
- Ability to make API requests and handle responses using packages like http.
- Understanding of the widget lifecycle, including state build init and dispose.
